

Middleweight Motion / Graphics Designer

As a key member of the Eclipse, based in our Beckenham office, you are a motion and graphic middleweight designer with experience working on a vast range of motion and graphic projects, working within the event production industry.

You are a talented and committed designer, passionate about digital storytelling, the animation process and design thinking, with a strong understanding of graphic design.

You are able to work alongside other designers and project managers.

You have strong communication skills and the confidence to both present ideas and get involved in all stages of the creative process, from concept creation, to story boarding, and final production.

Key responsibilities

- Be a creative and methodical multidisciplinary designer with the ability to work on a wide variety of projects utilising skills in graphic design, animation and film techniques.
- Participate and contribute to story boarding and creative idea generation for projects, with the ability to sketch out ideas.
- A deep understanding of the animation process, working with the motion graphics team to take design concepts through to final design, this includes creation of animations for both internal and external clients.
- Be able to take and disseminate briefs and creative direction from the wider team to both edit/create videos as well as graphic print.
- Be responsible for accomplishing and maintaining a quality of design throughout all phases of the design process, showing complete attention to detail, with a deep understanding of the target audience and how they connect with the final design.
- Deliver work according to an agreed timescale and be able to work on multiple projects simultaneously.
- Be flexible in design and able to take direction, feedback and observations with a positive attitude.
- Work collaborative with members to the wider Eclipse team to ensure work is fully co-ordinated.
- Carry out ad hoc duties as requested by appropriate members of the team.
- On occasions, to be able to work with the Eclipse team onsite, editing or operating as needed.
